

Bone Detectives

Team Members: _____

Observations: Describe what you see. What differences do you notice between the two bones?

Bone on top	Bone on bottom
Similarities	Differences

Inference: Based what you observed, which bone likely caused a problem for the moose? How might this problem have affected the moose?

Observations (What do you see? What differences do you notice between the two bones?)

Bone on left	Bone on left
Similarities	Differences

Inference (Based what you observed, which bone likely caused a problem for the moose? How might this problem have affected the moose?)
